Re: Submittal of Georgetown Steam Plant Interim Action Work Plan under TSCA Risk-Based Disposal Approval Rules of 40 CFR § 761.61(c)

Dear Mr. McLaren and Mr. Kowalski:

I am requesting a risk-based disposal approval pursuant to 40 CFR 761.61(c). This application has been reviewed and approved by the Washington Department of Ecology consistent with the MTCA/TSCA integration policy for Lower Duwamish Waterway source control work.

The City of Seattle and The Boeing Company are collaborating on the removal of soils contaminated with PCBs at the Georgetown Steam Plant (GTSP) and adjacent North Boeing Field. The attached work plan describes soil excavation planned for the GTSP property. A separate work plan will be submitted by Boeing for the adjoining North Boeing Field property. This work is scheduled to be conducted from mid-July through September of this year.

If you have any questions, please contact me at (206) 684-3167 or at Jennie.Goldberg@Seattle.Gov.

Sincerely,

A handwritten signature in black ink that reads "Jennie Goldberg".
